

RIDER AND STAGING

We truly want to make your entertainment one less detail for you to have to worry about. We have put together a rider that answers most of the typical concerns and questions of our clients. We will be more than happy to contact your venue to handle all needed details.

Staging

We are extremely flexible with limited performance areas if necessary. General guideline: 4- 6 piece band: 14' wide x 12 ' deep area, riser, or stage with steps. Note: if you are using backdrops, plants, or other decorations- please allow for this as our minimum space required.

Power

Two 20-amp grounded circuits, within 25 ft of performance area, to be made available at load in time. Because of lighting and sound equipment loads, we ask that these outlets be for the exclusive use of the band.

Load in/Setup

The band requires approximately 90 minutes prior to the performance for setup and system test and approximately 1 hr. for breakdown. The band is extremely conscious and considerate of furnishings during load in and load out.

Dressing Area/Green Room

For events over one hour, Purchaser is asked to please provide a secure room, (not a rest room) or curtained area that can comfortably accommodate and seat the members, with a clothes rack or similar contraption that wardrobe may safely be hung on. Bottled Water, Strong Coffee, and Soft Drinks would be most greatly appreciated.

Additional Notes:

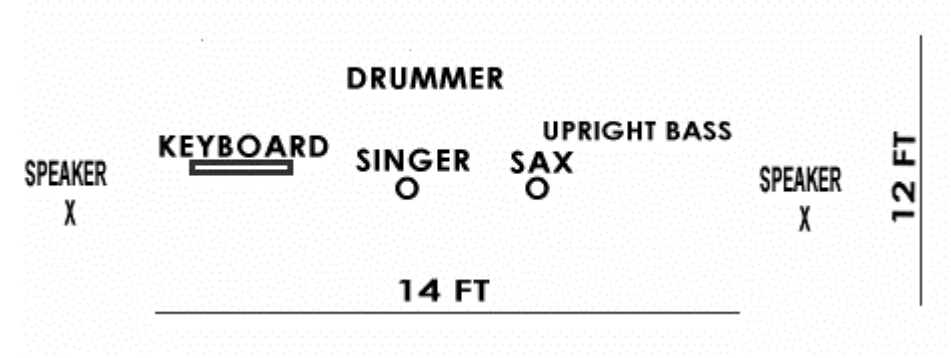

- Breaks are typically 15 minutes for every 45 minute set and can absolutely be adjusted to suit your program if needed. We do provide break music. The break music is not the same songs as on our songlist, so you won't hear the same song twice. You are also most welcome to bring the CD or ipod music of your choice.
- It is often customary to provide a vendor meal for the musicians. If this is not the case, please let us know in advance so that we can make other arrangements
